Content D

Part D Nature Phenomena and Innovative Engineering		
Peng Li, Xi Fang, Xiaoyu Zhang, Zhuoqiu Li	Reconstruction of electrical impedance tomography using improved Newton-Raphson algorithm based on wireless distributed system	**7**
Li Daniel, Jun Wang, Mingjie Li, Xi Li, Zhenping Sun, Zheng Leng	Estimation on concrete trench barrier effect: a hybrid experimental method based on neural network model	**14**
Jin-min Guo, Yi Wang	Experimental research on modified polymer concrete	**24**
Quntai Shen, Zixing Shen, Sheng Li	The hardware design of Type B residual current device	**28**
Zi-jing Wang	Study on steel box girder with partial precast concrete deck by top-down method	**34**
Suming Li, Long Quan	Measurement circuit of solenoid inductance sensor	**39**
Wenguang Liu, Ren He, Zhuan You	Analysis of assist characteristic of electric hydraulic power steering system	**46**
Qiufang Zhao, Hongge Fu, Tao He, Sitong Lu	The influence of the steering wheel angle on vehicle handling stability	**51**
Desheng Liu, Zhiru Xu, Wenping Chen, Jingguo Zhou	Research of coal gas warning model based on fuzzy clustering	**56**
Jichang Zhao, Yuanxue Liu, Yu Zhang, Yizhong Tan	New performance-based seismic design thought and stability evaluation of underground engineering	**60**
An-ran Xu, Qing-wei Ye, Jia-huan Qiang, Sheng-qi Shan, Dan Zhang	A wavelet time entropy algorithm for ultrasonic signal detection	**69**
Hongling Zhang, Bin Hong, Yuan Gui, Xiaoqing Yang	The research on thermal expansion and thermal compensation method of Rogowski coils	**74**
Yan Zhang, Wenxing Ma, Zhe Yuan	Shift schedule with dynamic three-parameter brought in angular acceleration of engine	**79**
Chao Fu, Junying Sun	Application of vibration analysis in the condition monitoring of electrical equipment	**85**
Honghui Zhang, Wenbo Geng	Study on the stability of hybrid systems	**91**
Zequn Zheng	Finite Element Analysis of Mechanism Behaviour of Multi-tower Self-anchored Suspension Bridge	**96**
Yongqiang Hu, Liansheng Tang, Zhizhong Li, Haitao Sang	Time-related Increase Evaluation in Bearing Capacities of End Bearing Jacked Piles by a New Type of CPT	**103**
Hua-Zhong Li, Yong-Sheng Liang, Qiang-ping Tang	Parallel Algorithm for Collision Avoidance Motion Planning of Dual Arm Grasping of Humanoid Robot	**110**
Chen Jialin, Zhang Mingyu, Duan Jiahua	Fault Diagnosis Model of Transformers Based on Neighborhood Rough Set and Relevance Vector Machine	**117**
Beibei Qi, Jianping Hu, Chenghao Han, Yeliang Geng	Near-threshold adiabatic SRAM based on CPAL circuits with DTCMOS technique	**121**
Jingyuan Li, Hua Wang, Xiaochuan You, Min Ding, Jinsan Ju	Research on seismic response of a large liquid storage tank using equivalent load method	**127**
Jingyuan Li, Qiang He, Kai Zhang, Zichen Lin, Min Ding, Jinsan Ju	Slipping coefficient study of frictional high strength bolt joint	**133**
Wang Xiao-Yuan, Wang Guang-Yi	Research on memristor and LDR memristor mathematic models	**138**
Hao Wu, Yong Peng	The designs of iron roughneck working torque real time monitoring scheme and the hardware system	**145**
Guo Wang, Xiaoxiang Pei	Finite element simulation of stray currents on subway shield tunnel	**150**
Zhiguo Zhao	Analysis of heavy vehicle rollover and stability	**157**
Lei Zhou, Shengchao Guo	Thermal management of ARM SoCs using Linux CPUFreq as cooling device	**162**
Liang Zhao, Lidan Ji	Characterization of water flooded layers of alluvial fan reservoirs in China Xinjiang oil field	**168**
Fan Liang, Zhou Zhixiang	Study on the shear capacity of PBH shear connector basing on PBL shear connector	**174**
Zhao Guang-yuan	Specialty-oriented “Computer Network” experiment design	**181**
Fang Li, Qun Chen	The study on computer aided building renovation simulation	**187**
Tao He, Xinquan Ye	An intellectual fault detection and alarm system based on multitude of tools	**193**
Shengcai Li, Youjun Zhao, Yu Liu	Numerical simulation of seismic damage evolution of ancient masonry pagodas in China	**198**
Shengcai Li, Can Wang, Yuewen Gao	Suitability of polymer mortars for repairing seismic damaged ancient masonry pagodas	**204**
Xin-liang Cao, Wei Cui, Xin-cheng Ren	The hysteresis characteristics of a sensor with sensing memory function and linearization	**211**
Hui Li, Yanyan Zhang	Analysis of conductive particle electric characteristics for anisotropic conductive adhesive film	**216**
Yongming Yang, Yaqiang Li	Demagnetization fault diagnosis of permanent magnet in synchronous motor	**221**
Gang Zhao, Guangyan Zhao, Yufeng Sun	Theoretical model of materiel quality characteristics metrics	**226**
Ruilian Wang, Yunda Gao	Vibration fault processing experiment and analysis of hydropower unit	**233**
Liu Sichen, Huang Xinyuan	Effect analysis of the interface design of humanized mobile phones using the structural equation model	**240**
Yucheng Zhang, Fangtao Yu	The study of wireless signal propagation characteristics under micro-cellular environment	**245**
Wei Wang, Zhijie Zhang	The research on the dynamic compensation and real-time processing method of the shock wave's pressure sensor	**250**
Ping Chen, Xiaoqing Li, ShiDong Luo	The influences of coupling beam device on the collision response between cable-stayed bridge and its approach bridges	**255**
Liming Wu, Zijian Wang,	Research on physical parameter damage identification of chimney structure under excitation response of earthquake	**260**
Cuixia Zhang, Conghu Liu, Lei Liu	Diagnosis and application of carbon footprint for machining workshop on energy saving and emission reduction	**265**
Men Sen, Yan Lei, Qian Hua, Wu Jian	Design and modelling of the self-propelled hedge trimmer	**271**
Li Jun Zheng, Yuan Da, Wang Bin	High-accuracy ultrasonic positioning through optimization of the extended Kalman filter algorithm	**277**
Xiaojun Zhu, Guoan Zhang	A linearly-polarized passively mode-locked yb-doped fiber laser with nanosecond pulses	**284**
H F Wang, Y H Fan	Unstructured meshes calculation method for reponse amplitude operators of TLP wind turbines	**289**

Yan Chen, Kang-Shun Li, Shan Chang, Lei Yang	A new 3D graphical representation for similarity/dissimilarity studies of protein sequences	**296**
Jianchao Zhang, Na Liu, Yanjun Han	Grinding force of profile-grinding bearing rail platform for ballastless track slabs	**304**
Zhong-liang Lu, Yin-zheng Li, Hong-li Wang	Research on application of inflatable rubber support in actual mining roadway	**310**
Liu Yang, Chunguang Xu, Xianghui Guo	Ring-shaped array ultrasound imaging using ellipse algorithm	**315**
Guoqing Zhang, Jun Fan	Spatial model and safety evaluation for water supply and drainage system and fire fighting system of football field	**321**
Yong Wang, Dongye Sun, Changzhao Liu	Study on characteristics of external load of transmission system for cutting unit of shearer under multiple load cases	**326**
Zijian Wang, Liming Wu, Shengxie Xiao	Streaming numerical simulation of cylinder pier laminar flow and control measure research on external concave rib	**331**
Xiao Liu, Haixiao Lin, Fan Zhang	Study on ratio of similar materials based on coal mass strength	**336**
Chen Ping, Li Xiaoqing, Luo Shidong	Vibration research of cable-stayed bridge with tower-girder consolidation	**341**
Zong Zheying, Wang Chunguang, Zhang Yong, Zhang Chunhui	Greenhouse temperature controller design based on the fuzzy PID	**346**
Bing Xie Yunling Ma, Wuxiu Ding	Numerical study on Brazilian test of slate with different bedding orientations	**350**
Zhong-liang Lu	The movement rule of rust in primary airflow on fully mechanized heading faces and its numerical simulation	**356**
Qianzhong Jia, Hongtao Zhang, Man Li	Effect of heat treatment on property of brazed joint	**361**
Yan Wang, Tiehua Ma, Jiangjiang Zhu	Analysis on cushion performance of quartz sand in high-g shock	**367**
Author's Index		**371**
Cumulative Index		**372**
